Does the Strategy "Fly under the Radar" of Institutional Money Managers? 30
Summary 30
References 31

CHAPTER 3: Backtesting 33

Common Backtesting Platforms 34
Excel 34
MATLAB 34
Python 36
R 38
QuantConnect 40
Blueshift 40
Finding and Using Historical Databases 40
Are the Data Split and Dividend Adjusted? 41
Are the Data Survivorship-Bias Free? 44
Does Your Strategy Use High and Low Data? 46
Performance Measurement 47
Common Backtesting Pitfalls to Avoid 57
Look-Ahead Bias 58
Data-Snooping Bias 59
Transaction Costs 72
Strategy Refinement 77
Summary 78
References 79

CHAPTER 4: Setting Up Your Business 81

Business Structure: Retail or Proprietary? 81
Choosing a Brokerage or Proprietary Trading Firm 85
Physical Infrastructure 87
Summary 89
References 91

CHAPTER 5: Execution Systems 93

What an Automated Trading System Can Do for You 93
Building a Semiautomated Trading System 95
Building a Fully Automated Trading System 98
Minimizing Transaction Costs 101
Testing Your System by Paper Trading 103
Why Does Actual Performance Diverge from Expectations? 104
Summary 107

CHAPTER 6: Money and Risk Management 109

Optimal Capital Allocation and Leverage 109
Risk Management 120
Model Risk 124
Software Risk 125
Natural Disaster Risk 125
Psychological Preparedness 125
Summary 130
Appendix: A Simple Derivation of the Kelly Formula when Return Distribution Is Gaussian 131
References 132

CHAPTER 7: Special Topics in Quantitative Trading 133

Mean-Reverting versus Momentum Strategies 134
Regime Change and Conditional Parameter Optimization 137
Stationarity and Cointegration 147
Factor Models 160
What Is Your Exit Strategy? 169
Seasonal Trading Strategies 174
High-Frequency Trading Strategies 186
Is it Better to Have a High-Leverage versus a High-Beta Portfolio? 188
Summary 190
References 192

CHAPTER 8: Conclusion 193

Next Steps 197
References 198

Appendix: A Quick Survey of MATLAB 199

Bibliography 205
